

# Custom Built Equipment

Cross Country's Custom Fabrication Team can build your machinery to best suit your project. We will go above and beyond to accommodate your needs.

**These Units are Available for Rental or Sale**

## Terramac RT9 Tack Rig

Customizations Include:

- Specially designed 12-foot weld deck
- Built-in forklift pockets and easy clamp securement systems
- Generator and registered electric control panel. Adjustable voltage and frequency for any country
- Rear ladder gives access to upper deck and bottle racks
- Remote generator controls on the "working side" for convenience and safety
- Front bumper canopy hydraulically controlled by the operator with a remote pendant controller
- Double door, lockable welder cabinet to accommodate a champion air compressor

## D6D Tack Rig

Customizations Include:

- Weight balanced for difficult terrains
- Generator on the rear deck positioned for less noise and no exhaust air directed towards the working personnel
- Controls and components located at eye level or below
- Hydraulically controlled folding canopy to protect workers
- Upgraded welder cabinet and electrical distribution panel
- Compact style bottle rack to allow for oxygen/acetylene, and propane bottles to be carried on tack rig for convenience
- Rear jib-pole on rear deck, along with rear ladder, and safety railings

**AVAILABLE DECK CUSTOMIZATIONS INCLUDE:**

**SAND BLAST DECKS / WELD DECKS / PERSONNEL CARRIERS / DUMP BEDS / AND MORE**
