

Dewatering Bags

Cross Country Dewatering Bags are made from strong geotextile filter fabric and are a great choice for removing sediment or silt when pumping water. Each Dewatering Bag is designed with 6oz nonwoven geotextile which allows for the best filtration capability. They are stitched in a two thread chain stitch pattern for the toughest strength. Cross Country carries the following Dewatering Bags.

Variations:

- Blue - 3' x 5'
- Orange - 5' x 7'
- Yellow - 10' x 10'
- Silver - 5' x 15'

The bags are colour coded for each size. They also have eyelets for easy dragging and lifting, and removable clips.
