

Geosynthetic Products

We sell and install all kinds of Geosynthetic products and pride ourselves in building long standing relationships not only with our customers but with our suppliers as well.

We provide a variety of liners and geotextiles which are used for many different applications such as; golf courses, canals, Wastewater treatment plants, Garbage Disposal Sites, secondary Containments, temporary construction ponds, and tank liners.

Please ask about our above ground temporary water storage tanks, up to 2 million gallons.

Material	Details
HDPE Liner	High Density Polyethylene (HDPE) 30-100 MIL
Nonwoven Geotextile	Nonwoven geotextiles are produced by needle punching polypropylene synthetic staple fibers in a random network to form a high strength, dimensionally stable fabric. The fibers are specifically formulated to resist ultraviolet light deterioration, and are inert to commonly encountered soil chemicals. The fabric will not rot or mildew, is non-biodegradable, and is resistant to damage from insects and rodents. Polypropylene is stable within a ph range of 2 to 13.
Polypropylene Liner	Reinforced Polypropylene 36-60 MIL
Silt Bags
