Vehicle & Equipment Cabs Sanitization

Sanitizing Interiors

Vehicle and equipment cabs interiors normally contain many kinds of surfaces, from leather and metal to rubber and plastic where viruses can survive.

Vehicle & Equipment Cab sanitization is essential to ensure the safety of CCIS employees and customers. **Equipment cabs should be sanitized as soon as the equipment arrives and right before it is shipped to the customer.**

Supplies Needed: Standard PPE and:

- Disinfecting wipes or spray with disposable paper towel
- Disposable Latex, Nitrile or Rubber gloves
- Face Cover and Shields are available for employee want to use them.
- Disposable Trash bag

Contact Schain@crosscountryis.com if your branch needs cleaning supplies.

Wash your hands before and after you sanitize and Do not touch your face.

Use disinfecting wipes or spray with disposable paper towel on commonly touched areas such as:

- Door panel buttons
- Steering wheel and controls
- Dashboard, switches and knobs
- Shifters, switches & knobs
- Key or fob
- Seat belts
- Touchscreens
- Arm rests

When done, put used PPE in the trash bag, seal and dispose of in the trash.
