

# Instant Cofferdams

**HalenHardy**

**Faster Deployment | Take up Less Space | Reusable**

A safer, faster, and more cost effective solution for your next dewatering project.

## INSTANT COFFERDAM BENEFITS

Lightweight design for super mobility and rapid deployment.

Instant Dams can be deployed in as little as five minutes.

Reuse over and over and over again.

Save time, labor and money, then reuse and save again.

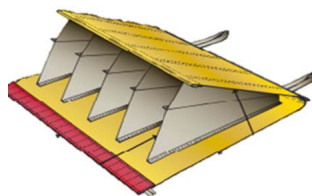

## SPEED AND SPACE TECHNOLOGY

Old Way

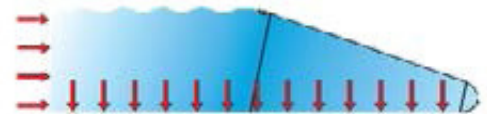

It takes hundreds of sandbags and man hours to do the same job that an Instant cofferdam does in just minutes.

Our Way

Innovative delta wing design uses the weight and flow of the water (or spill) to create a Cofferdam.
